

Support for Projects Using Compost

We're offering financial and technical help for organizations to use compost in their earthwork, landscaping and gardening projects.

WHO

Any type of organization – government, for-profit, non-profit, community-based.

WHAT

Financial and technical help using compost in earthwork, landscaping and gardening projects.

WHEN

Throughout 2022 – apply now!

WHERE

Projects located in Ramsey and/or Washington counties.

WHY

The goal of this project is to help develop markets for finished compost derived from food scraps. Having markets for compost helps complete the circle of material use.

Financial Support

- > Purchase and delivery of compost
- > Rental of equipment to integrate compost
- > Payment for analyses such as before and after soil testing, water retention/drainage, and crop yield.
- > Staff time up to 50% of 1 FTE for time spent on the project

Technical Assistance

- > Planning for purchase and integration of compost, measurement and analysis of impacts of compost
- > Identifying sources of equipment to best integrate finished compost
- > Identifying sources of and arranging services for analysis of impacts of finished compost
- > Documentation of impacts of finished compost, such as before and after pictures

To get started, visit RecyclingAndEnergy.org/Compost.

This is a project of Ramsey/Washington Recycling & Energy, in coordination with Ramsey and Washington counties.
