NEXT MEETING: Thursday, April 25, 2024 | 10 a.m. – 12 p.m. | Ramsey County Environmental Health, Maplewood

THURSDAY, FEBRUARY 29, 2024
RAMSEY/WASHINGTON RECYCLING & ENERGY BOARD MINUTES

A meeting of the Ramsey/Washington Recycling & Energy Board (R&E Board) was held at 10 a.m. on Thursday, February 29, 2024, at Ramsey County Environmental Health Offices, 2785 White Bear Avenue North, Suite 350, Maplewood, Minnesota. Members of the public attended remotely or in person at the Maplewood address.

MEMBERS PRESENT

Commissioners Karla Bigham, Michelle Clasen, Gary Kriesel, Fran Miron – Washington County
Commissioners Nicole Frethem, Trista Martinson, Rafael Ortega, Victoria Reinhardt, Mai Chong Xiong – Ramsey County

MEMBERS NOT PRESENT

Commissioner Stan Karwoski - Washington County
Commissioner Mary Jo McGuire (alternate) - Ramsey County

EX OFFICIO MEMBERS PRESENT

Dave Benke, Minnesota Pollution Control Agency (MPCA)

EX OFFICIO MEMBERS NOT PRESENT

Tom Ingemann, City of Newport

ATTENDING AT RAMSEY ENVIRONMENTAL HEALTH, MAPLEWOOD

Leigh Behrens, Dave Brummel, Rae Eden Frank, Kelli Hall, Sam Hanson, Sam Holl, Susan Jamison, Kevin Johnson, Cassie Lefeber, Andrea McKennan, Marcelo Neblett, Matt Phillips, Jim Redmond, Michael Reed, John Ristad, Daniel Schmidt, Jody Tharp, Darren Tobolt

ATTENDING REMOTELY

Alison Cameron, Tammy Christopherson, Max Dalton, Dan Donkers, Abigail Drehmel, Tutu Fatukasi, Sam Ferguson, Annalee Garletz, Jamie Giesen, Jessica Hall, Filsan Ibrahim, Fatima Janati, Caleb Johnson, Hannah Keller, Randy Kiser, Nick Kluge, Juna Ly, Ashley Marston, Leslie Duling McCollam, David McConnell, Rob Murray, JoAnn Nordrum, Jessica Paquin, Gabe Reynolds, Minette Saulog, Alissa Schmidt, John Springman, Uriel Rosales Tlatenchi, Jenna Venem, Margaret Vesel, Ami Wazlawik, Caleb Werth

CALL TO ORDER/APPROVAL OF AGENDA

Chair Miron called the meeting to order at 10:01 a.m. Introductions were made. Commissioner Reinhardt moved, seconded by Martinson, to approve the agenda as presented. Motion carried. Ayes: Bigham, Clasen, Frethem, Kriesel, Martinson, Miron, Reinhardt, Xiong. Nays: None.

APPROVAL OF MINUTES

Commissioner Bigham moved, seconded by Clasen, to approve the minutes of January 25, 2024. Motion carried. Ayes: Bigham, Clasen, Frethem, Kriesel, Martinson, Miron, Reinhardt, Xiong. Nays: None.

CONSENT AGENDA

Commissioner Reinhardt moved, seconded by Frethem, to approve Resolution R&EB-2024-02, Consent Agenda. The R&E Board approves:

- An Agreement between the R&E Board and Ziegler, Inc., for the term of March 1, 2024, through February 28, 2025, for rebuild services in the amount of \$420,316.60, with an additional \$40,000 available for contingency funds should additional rebuild needs be discovered during the rebuild process.
- An Agreement between the R&E Board and The Good Acre, for an initial term of March 1, 2024, through February 28, 2025, in the amount of \$65,000, for food recovery services.

Motion carried. Ayes: Bigham, Clasen, Frethem, Kriesel, Martinson, Miron, Reinhardt, Xiong. Nays: None.

Commissioner Ortega arrived.

MANAGEMENT AND ADMINISTRATION

Technical Assistance Contract Preauthorization

Sam Hanson, R&E Joint Activities manager, introduced the Technical Assistance RFP and provided background and the importance of having contracted technical assistance for Joint Activities programs. R&E has not done an RFP for this work in a few years.

Jim Redmond, R&E contract manager, explained the goals of issuing a continuous RFP for multiple vendors rather than a traditional RFP and why R&E is requesting delegated authority for the Joint Leadership Team (JLT) to enter into contracts that may exceed \$175k. One concern was ensuring a new vendor could be brought on quickly to avoid a gap between the current vendor and a future vendor given the time required to bring the new contract back to the board for approval.

Commissioners discussed concerns about the open-ended nature and lack of a cap on the request amount. Commissioners discussed the issue of turnaround time for small and larger vendors and questions were raised about the urgency of needing to have JLT approve contracts vs. bringing them back to the board for approval. Commissioner Frethem recommended a motion to amend the resolution to clarify that JLT can approve contracts that do not exceed \$175k per year and that do not exceed a total contract amount of \$500k over a period of up to 5 years. The motion did not move forward.

Commissioner Bigham recommended launching the RFP on April 1, 2024, instead of March 1, 2024, as currently planned. The Facility & Finance Committee meets on March 14, 2024. The proposal resolution could be reviewed at that time and brought back to the R&E Board on March 28, 2024.

Commissioner Reinhardt moved, seconded by Miron, a date-certain postponement to March 28, 2024, with proposed language reviewed by the Facility & Finance Committee on March 14, 2024.

Motion carried. Ayes: Bigham, Clasen, Frethem, Kriesel, Martinson, Miron, Ortega, Reinhardt, Xiong. Nays: None.

LCCMR Grant for Anaerobic Digestion

Michael Reed, Ramsey County and R&E Joint Leadership Team (JLT), shared that R&E intends to submit a grant request to the Legislative-Citizen Commission for Minnesota Resources (LCCMR) to submit a proposal for funding through the Minnesota Environment and Natural Resources Trust Fund (ENRTF).

One requirement of that grant application is a resolution from the governing board. Although the Joint Powers Agreement (JPA) explicitly states that the organization can pursue grants on its own, because LCCMR explicitly called out the need for a resolution, it is brought to the board with a request for approval. The resolution is written broadly enough to accommodate future grant applications for state and federal funding as well.

Commissioner Martinson moved, seconded by Frethem, to approve Resolution R&EB-2024-03, LCCMR Grant for Anaerobic Digestion. The R&E Board:

- Approves the resolution authorizing R&E staff to submit a proposal for a LCCMR grant.
- Authorizes R&E staff to submit future grant applications on behalf of R&E to receive state and federal funding.

Motion carried. Ayes: Bigham, Clasen, Frethem, Kriesel, Martinson, Miron, Ortega, Reinhardt, Xiong.
Nays: None.

UPDATES AND REPORTS

Executive Director Search Update

Kelli Hall, R&E Human Resources manager, provided an update on the executive director (ED) search. In January 2024, the hiring of an ED was paused. R&E is now ready to move forward, beginning with the search for a recruiter in March 2024. The anticipated timeline is posting of the position in April, interviewing in May, candidate recommendation brought to the board in June or July and having an ED in place in the third quarter of 2024.

Partnership Board Update

Commissioner Reinhardt, Chair of the Partnership on Waste and Energy (PWE) Board, provided an update from the PWE Board meeting on January 25, 2024. Funding for further study of wood waste management was included in the PWE budget, particularly due to the uncertainty of District Energy continuing to utilize wood biomass as a fuel source and the anticipated increase in wood waste volumes due to the emerald ash borer.

PWE staff reviewed the legislative goals and efforts related to wood waste, extended producer responsibility (EPR), SCORE funding, a bottle bill, electronics recycling, a clean lighting bill, a fair repair act, clean transportation, Closed Landfill Investment Fund (CLIF) and Metropolitan Landfill Contingency Action Trust (MLCAT).

Michael Reed provided an update on the EPR bill and how it affects waste management.

Dave Benke, MPCA, shared that the agency is looking at the backside of the proposed EPR legislation and has provided input. The agency sees the same need for it as PWE. They are also looking at toxicity issues, such as batteries. The state Solid Waste Management Plan is being finalized, after which the counties will finalize their individual plans.

Commissioner Reinhardt highlighted the importance of the counties working in partnership with the MPCA, state and federal governments on advancing anaerobic digestion.

Joint Activities Updates

Sam Hanson, R&E Joint Activities manager, shared that a report of R&E Center tours conducted since the prior board meeting will be included in each board packet.

In 2023, a discussion about JA staffing and budget was held with the board. As a result, JA developed a strategic planning process, which was launched in fall 2023.

R&E has had a contract with Second Harvest Heartland (SHH) for many years. In late 2023, R&E confirmed that SHH was making changes and would no longer provide transportation to pick up food from local stores and deliver it to food shelves; rather, SHH would connect shelters directly with stores. R&E has decided not to renew the SHH contract and asked them for a new proposal to make sure it aligns with the organization's goals of reducing food waste. Staff are reviewing SHH's proposal and plan to share more information with the board as it evolves. R&E is well positioned to work with local food shelves and food rescue organizations through BizRecycling food recovery grants.

Commissioner Miron inquired about the general details of the previous contract. Hanson said the contract was \$40k per year for roughly ten years. Michael Reed shared that prior to R&E's existence, support was provided for a refrigerated truck.

Facility Update

Sam Holl, R&E Center facility manager, shared information on three facility updates. Commissioning continues on processing enhancements, including the food scrap and recyclable recovery lines. The equipment vendor's team worked at the facility for seven weeks to commission the equipment.

R&E is experiencing the cost of being first in the work of food scraps recovery. Currently, there is an 80-85% recovery rate. The installing vendor continues to work on the artificial intelligence (AI), with expected updates on March 7 or 8, 2024.

The recyclables recovery line targeting #1 and #2 plastics is achieving 95% recovery, with 79% purity. 95% recovery, with 98% purity, is achieved with PET plastics and recovery of non-ferrous materials is reaching 98% purity. Recovery of organic-rich material for AD met specifications, with samples analyzed at three separate labs to confirm.

Procurement Report

Jim Redmond, R&E contract manager, presented the report for the period January 1, 2024, through January 31, 2024.

OTHER

Invitation for Comments from Ex Officio R&E Board Members

Dave Benke, Minnesota Pollution Control Agency (MPCA), said the legislative session is currently MPCA's primary focus, as well as the state's Metropolitan Policy Plan and county development of their respective Solid Waste Management Plans.

Commissioner Clasen introduced Wendy McKellips from the Washington County Master Gardeners.

Tom Ingemann, City of Newport, had no comments to add.

ADJOURN

Chair Miron declared the meeting adjourned at 11:46 a.m.

**RAMSEY/WASHINGTON
RECYCLING & ENERGY**
CONNECTING VALUE TO WASTE

R&E BOARD MEETING DATE:	March 28, 2024	AGENDA ITEM:	VI.a
SUBJECT:	Facility & Finance Committee Report		
TYPE OF ITEM:	<input checked="" type="checkbox"/> INFORMATION	<input type="checkbox"/> POLICY DISCUSSION	<input type="checkbox"/> ACTION <input type="checkbox"/> CONSENT
SUBMITTED BY:	Facility & Finance Committee		

R&E BOARD ACTION REQUESTED:

None.

EXECUTIVE SUMMARY:

The Facility & Finance Committee met on March 14, 2024. Committee member Commissioner Martinson will provide a report to the board, including:

1. 2023 Year-End Budget
2. 2025 Budget Planning
3. Technical Assistance Preauthorization RFP
 - a. Draft Resolution R&EB-2024-04, requesting delegated authority, has been withdrawn from Board consideration. Staff reviewed plans related to contracts resulting from this request for proposals (RFP), and they have identified alternative pathways to achieving needs and goals within the existing procurement guidelines without preauthorization authority.

**RAMSEY/WASHINGTON
RECYCLING & ENERGY**
CONNECTING VALUE TO WASTE

R&E BOARD MEETING DATE:		March 28, 2024				AGENDA ITEM:		VI.b	
SUBJECT:		Specialized Labor Services Vendor Selection							
TYPE OF ITEM:		<input type="checkbox"/>	INFORMATION	<input type="checkbox"/>	POLICY DISCUSSION	<input checked="" type="checkbox"/>	ACTION	<input type="checkbox"/>	CONSENT
SUBMITTED BY:		Joint Leadership Team (JLT)							

R&E BOARD ACTION REQUESTED:

1. Approve The Boldt Company as the selected vendor to provide specialized labor services to Ramsey/Washington Recycling & Energy (R&E) for an initial term of two years beginning on May 1, 2024, with the option for three one-year renewals.
2. Authorize the Joint Leadership Team (JLT) to execute the agreement with The Boldt Company, and any amendments or change orders thereto, provided it is within the project budget and upon approval as to form by the county attorney.

EXECUTIVE SUMMARY:

The R&E Center needs specialized labor services to provide additional specialized labor for projects performed during outages, in emergencies and on an as-needed basis. The current contract for these services runs through April 30, 2024, and staff recommended issuing a solicitation to obtain competitive proposals for these services. On November 30, 2023, a solicitation was issued, and four proposals were received and deemed responsive. An evaluation committee reviewed the proposals based on the criteria outlined in the solicitation and selected finalists for interviews.

After interviewing finalists, the evaluation committee recommends the selection of The Boldt Company to provide specialized labor services based on their extensive experience, commitment to safety and the lowest pricing amongst submitted proposals. The proposed initial contract term is for two years, beginning on May 1, 2024, with the option of three one-year renewals.

ATTACHMENTS:

1. Draft resolution
2. The Boldt Company Proposal

FINANCIAL IMPLICATIONS:

These services are expected to cost about \$500,000 per year and are included in the approved Facility 2024-2025 budget.

RESOLUTION R&EB-2024-05
Specialized Labor Services Vendor Selection

WHEREAS, The Ramsey/Washington Recycling & Energy Board (“R&E Board”) is governed by the Amended and Restated Joint Powers Agreement by and between Ramsey County and Washington County dated July 18, 2023 (“Joint Powers Agreement”); and

WHEREAS, The R&E Board adopted Procurement Guidelines on April 21, 2022 (Resolution R&EB–2022-06), which specify the procurement methods for contracts and purchases; and

WHEREAS, The R&E Board approved the 2024-2025 Joint Activities and Facility and Equipment Maintenance & Replacement (“EM&R”) budgets on July 27, 2023, in accordance with Section V.B.8 of the Joint Powers Agreement; and

WHEREAS, The R&E Board has a need to contract for facility maintenance supplies and services; and

WHEREAS, The existing contract for Specialized Labor Services expires on April 30, 2024, and R&E staff recommended the issuance of a Request for Proposals to solicit proposals for future services; and

WHEREAS, Ramsey/Washington Recycling & Energy (R&E) issued a Request for Proposals for Specialized Labor Services on November 30, 2023, to provide additional, skilled labor as needed for special projects scheduled during facility outages, as well as during emergencies and on an as-needed basis; and

WHEREAS, R&E received four responsive proposals, which were evaluated by a three-person evaluation committee based on primarily the proposer’s qualifications, demonstrated understanding and approach, cost and references; and

WHEREAS, After interviewing finalists, the evaluation committee recommends entering into a contract with The Boldt Company based on their commitment to safety, extensive experience and lowest pricing among the submitted proposals. NOW, THEREFORE, BE IT

RESOLVED, The R&E Board hereby approves The Boldt Company as the selected vendor to provide specialized labor services to R&E for an initial term of two years beginning on May 1, 2024, with the option for three one-year renewals. BE IT FURTHER

RESOLVED, The R&E Board authorizes the Joint Leadership Team to execute the agreement with The Boldt Company, and any amendments or change orders thereto, provided it is within the project budget and upon approval as to form by the county attorney.

James Redmond
Ramsey/Washington Recycling & Energy

RE: Specialized Labor Services

Dear Mr. Redmond,

On behalf of The Boldt Company, we thank you for the opportunity to propose our Boldt team for the Ramsey/Washington Recycling & Energy Specialized Labor Services Projects. Boldt is a company that takes pride in our innovative and collaborative approach to delivering projects and values the relationships we build. With decades of providing maintenance service to our customers throughout Minnesota, Boldt understands the need for quick responses to our clients' requests.

HISTORY & BACKGROUND:

The Boldt Company was started 135 years ago by Martin Boldt. His first ad reflects the values we still hold today, "Honest and reliable contractor." We are now in the 4th generation of the Boldt family ownership and a national leader in various market sectors such as industrial, healthcare, power and energy, and commercial.

Driven by a passion for providing the best services possible for our clients, Boldt relies on our strong relationships with local union trades to deliver high-quality projects with trained professionals. The experience and training of our team members equip us with the ability to assist you with planning longer-lead projects or react quickly to minimize any downtime, in addition to solving complex issues that can improve uptime productivity.

Knowing that our work has an impact on the world, we believe that the way we do our work can affect reducing waste and our carbon footprint. From paperless job sites to our construction waste recycling programs that prevent millions of tons of waste from entering our landfills, we are vigilant in finding ways to implement waste reduction and sustainable practices through our work. We share your vision of improving waste responsibility.

SUMMARY OF CLAIMS

We understand that this request is limited to alleged claims involving project disputes and that are outside the scope of our liability insurance. In the last five years The Boldt Company ("Boldt") has been involved in a minimal number of claims in the ordinary course of performing contracts that resulted in formal legal action. Most significantly, none of these cases were initiated by an owner seeking to recover damages from Boldt or asserting that Boldt's performance on the project was deficient. Based on that understanding, in the last five years we have been involved in the following litigation:

- A subcontractor has brought suit against us claiming it is owed money for an unresolved change order. This subcontractor has failed to follow the dispute resolution process in our subcontract. This matter was filed in April of 2019 and settled in May of 2019 without ever having had to file a responsive pleading.
- A subcontractor has brought suit against us claiming it is owed money after it failed to complete its subcontract in 2015 and we were forced to retain a replacement contractor to finish the subcontractor's work. We incurred the cost to complete the subcontractor's work without any cost to the Owner and asserted an offset against the subcontractor. This matter was filed in March of 2019 and settled in November of 2019 without ever having had to file a responsive pleading.
- Boldt served as a construction manager-agent (CMA) on a school project. The design for the egress to the project prepared by the project architect did not comply with the local code. After the non-complying road was installed by the owner's contractor, the non-compliance was discovered and the owner's contractor was required to reinstall the road. The contractor sued the owner for the costs of relocating the road and the owner joined Boldt, the designer and others in that lawsuit. This matter was filed against Boldt in December 2020 and was settled without Boldt having to file a responsive pleading in March 2021.
- Boldt terminated a subcontractor on a project that failed to follow the plans and specifications resulting in the need to perform corrective work. After the subcontractor was terminated, it filed suit for what is claimed was the unpaid subcontract balance, which was withheld to offset the cost of completing the corrective work and the damages resulting from its default. This matter is still pending.

PROPOSAL SUMMARY

Our proposal includes contact information for Aaron Utley, our Project Executive who will be the primary contact throughout the proposal. Additionally, we've provided a brief history and introduction to our firm, references from previous projects completed, resumes of key personnel involved in planning and delivering projects, and rates. We also acknowledge the addendum issued on January 2, 2024.

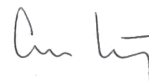

Our team is excited to demonstrate our commitment to Ramsey/Washington Recycling & Energy through proactive responses to your needs. Should you have any questions or require any additional information, please feel free to contact our team.

Attachment 1 – Solicitation Response Form

Solicitation Title: Specialized Labor Services RFP

The following shall be completed by the Contractor:

Contractor Company Name: The Boldt Company

Total Number of Solicitation Pages: 20

Total Number of Pages in Contractor's Solicitation Response: 20

Acknowledgement and Number of Solicitation Addenda
Received: Acknowledged

PLEASE READ THE FOLLOWING BEFORE COMPLETING THIS SOLICITATION RESPONSE FORM

The provisions of the solicitation document should be reviewed and understood before preparing a solicitation response. Unless the solicitation document provides otherwise, the solicitation response shall be the best price for all labor, equipment, materials and services for the project described in the solicitation document.

Price: Please outline hourly rates on the price sheet included in Attachment 4. The number of hours provided as needed for each role are approximate and subject to change from year to year based on the needs of R&E.

ACKNOWLEDGEMENT
By signing below, I certify that I understand, agree, and bind the Contractor to the provisions contained in the solicitation document for the above Solicitation, including the Solicitation and Contract Terms and Conditions and that I am authorized to submit this solicitation response on behalf of the Contractor.

COLLUSION
By signing below, I certify that this solicitation response has been prepared without any collusion with other contractors, competitors, R&E employees, Washington or Ramsey County employees, or R&E Board Members and without taking any other action which will restrict competition or constitute fraud or collusion.

Name and Title of Authorized Contractor Representative: Jason Krueger - Vice President & General Manager

Signature: 

Date: January 12, 2024

Solicitation Title: **Specialized Labor Services RFP**

The binding to the Contractor to the Contract Terms and Conditions is expressly conditioned on the parties reaching mutually agreeable terms with regard to those items identified in section 2.11, Exceptions to Terms and Conditions.

Attachment 2 – Contractor Information and Reference Form

R&E requires completion of this form for this solicitation. Failure to submit this completed form with the solicitation response will result in rejection of the Contractor's solicitation response.

Company Information:

1. Contractor Name (as on file with the MN Secretary of State's Office, if applicable): The Boldt Company
2. Name of CEO or Company President: Thomas J. Boldt (CEO), Dave Kievit (President)
3. FEIN / Contractor Tax ID Number: 39-0174190
4. Minnesota Business Licenses Filing Number: 15403
5. Local Telephone Number: 612-473-1290
6. Toll Free Telephone Number: N/A
7. Fax Number: N/A
8. Email Address:
9. Address: 9555 James Ave S #222
10. City: Minneapolis
11. State: Minnesota
12. Zip Code: 55431
13. Is your company a Certified Small Business Enterprise ("CERT SBE")? No
14. If yes, what is your CERT SBE#?

Solicitation Response Contact:

1. Name and Title of the person to contact for questions concerning this solicitation response: Aaron Utley
Project Executive
2. Local Telephone Number: 612-616-8615
3. Toll Free Telephone Number: N/A
4. Fax Number: N/A
5. Email Address: Aaron.Utley@Boldt.com
6. Address: 9555 James Ave S #222
7. City: Minneapolis
8. State: Minnesota
9. Zip Code: 55431

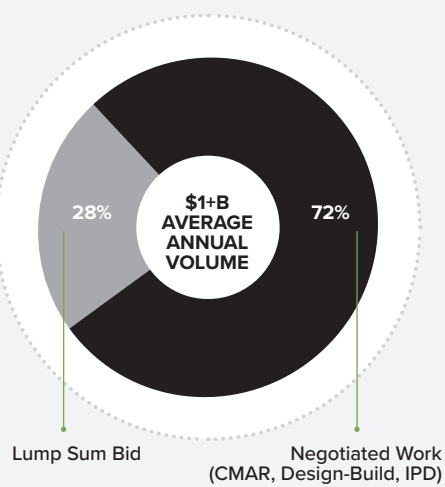

Contract Mailing Address (if different from Company Information):

1. Contact Name and Title: Jason Krueger Vice President & General Manager
2. Local Telephone Number: 507-884-5922
3. Toll Free Telephone Number: N/A
4. Fax Number: N/A
5. Email Address: Jason.Krueger@Boldt.com

9. Zip Code: 55431

BUILDING BOLDLY, SINCE 1889

We’ve stayed true to what Martin Boldt first set out to be — an honest and reliable contractor. Hard work, an innovative spirit and a commitment to our values have helped us grow into one of the largest professional construction services firms in the United States. Today, we’re a fourth-generation family and employee-owned company with offices throughout the country.

We’re proud of how far we’ve come but we’re not ready to rest on our laurels just yet. We’re dedicated to growing alongside our clients and partners to continue to meet their needs and the needs of the communities where we work, for the next century of business — and beyond.

BOLDT AT A GLANCE

- 4th.....generation family and employee ownership
- 18.....offices nationwide
- 134.....years in business
- 3000+.....employees on average
- \$1B+.....annual construction volume
- 90%.....repeat clients

^{*} ENGINEERING NEWS-RECORD - MIDWEST

LOCAL PEOPLE, NATIONAL KNOWLEDGE

Boldt first established a local office in northern Minnesota in 1978. Three decades later, we cut the ribbon on an additional office in Rochester, MN. Since then, we have expanded our local footprint with offices in Minneapolis, MN, and Eau Claire, WI. Now with 18 offices nationwide, we utilize over 134 years of experience, and the knowledge gained from our peers in other offices to bring any project to life. Our strong relationships within the region, and our national network, allow us to combine the best aspects of small organizations and large corporations.

OUR VALUES: HONESTY | FAIRNESS | HARD WORK | PERFORMANCE | LOVE OF CONSTRUCTION
OUR VIRTUES: HUMBLE | HUNGRY | SMART | RELIABLE | GRITTY

2.6 FIRM INTRODUCTION

WESTERN REFINERY - ST. PAUL PARK REFINERY

Since 1987, Boldt has had the opportunity to bring its breadth of construction expertise to the St. Paul Park Refinery. Over the years, Boldt has worked on a wide range of projects, from maintenance work to major capital projects. The St. Paul Park Refinery (SPPR) is located along the Mississippi River southeast of St. Paul Park, Minnesota, and was built in 1939. They have a crude oil refining capacity of 104,000 barrels per calendar day. Therefore, maintaining a peak operating schedule is critical to their business. Over the years, our work has allowed the facility to maintain its optimal operations. Our work has included scaffolding, sewer work, concrete foundations, grouting, fire proofing, structural steel, boilermaker work on heaters and heat exchangers, underground sewer repairs, road grading, and excavating. In addition, Boldt has provided the refinery with 24 hour-7 day emergency services.

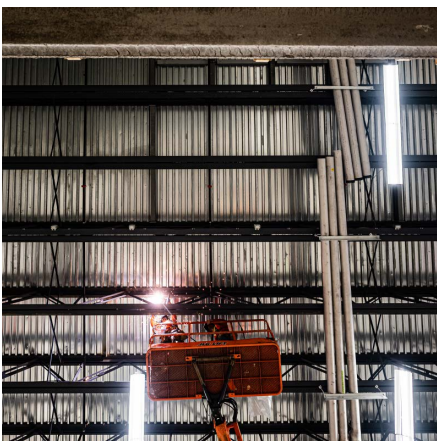

KEY TRADE SUPPORT: Millwrights, Ironworkers, Laborers, Carpenters

USG INTERIORS

Having a relationship with USG Interiors since 1985, the Boldt Company has completed hundreds of maintenance and capital projects throughout the years for their Red Wing and Cloquet facilities. Our work has included new construction, plant outages, office renovations, structural steel and foundations, concrete and equipment installations, manufacturing line conversions, warehousing space, boiler installations and manufacturing facility expansions. Our work was safely completed while facilities were in full operation or during planned shutdowns.

KEY TRADE SUPPORT: Millwrights, Ironworkers, Laborers, Carpenters

WESTROCK ST. PAUL

Resuming a relationship that previously existed for decades, the Boldt team has been providing ongoing maintenance and shutdown support for the WestRock facility in St. Paul in addition to capital improvements in the facility. Through pre-planning and sequencing meetings, we have met and exceeded plant schedules related to the scheduled maintenance of one machine at a time, while the others remain in operation. Through planning with the mill, our approach minimized the actual downtime of each maintenance cycle.

KEY TRADE SUPPORT: Millwrights, Ironworkers, Laborers, Carpenters

2.6 FIRM INTRODUCTION

NORTHSHORE MINING COMPANY

Owned and operated by Cliffs Natural Resources, this taconite processing facility produces over 5 million tons of taconite pellets annually. To keep up with production, it is critical that the concentrator and pellet plant are maintained to operate at peak efficiency. Boldt has been an on-site presence since the late 1980's helping the plant realize their production goals by completing capital projects and providing millwright, ironworker and labor support for the monthly maintenance downs on the pellet plant and concentrator.

KEY TRADE SUPPORT: Millwrights, Ironworkers, Laborers, Carpenters

UNITED TACONITE

Cliffs Natural Resources and Laiwu Steel Group took over ownership of this plant and embarked on a campaign to start up shutdown lines and make capital improvements to increase production. Currently this taconite processing facility produces over five million tons of taconite pellets annually. Imperative to meeting production goals is the routine maintenance to the pellet plant. In supporting the mine's production goals, Boldt maintains a small staff for more frequent maintenance work and staffs up to 60-80 during monthly shutdowns lasting from 1-4 days in duration.

KEY TRADE SUPPORT: Millwrights, Ironworkers, Laborers, Carpenters

SAPPI FINE PAPER

Boldt has had a steady presence at the Sappi facilities for decades. Together, Boldt and Sappi have maintained open communications which involved the construction of a multi-million-dollar pulp mill and power distribution system to several renovations and maintenance projects over the years. During this time, Boldt rebuilt several paper machines, installed winders, complete building additions, coater modernization, color kitchen and constructed a new bleach plant.

KEY TRADE SUPPORT: Millwrights, Ironworkers, Laborers, Carpenters

SELF-PERFORM CAPABILITIES

As one of the area's most capable self-performing union contractors, we have the skilled labor and experience to deliver serious value to our clients on their projects, both on projects where we self-perform and by using our experience as builders to input design for constructability. Additionally, we have a dedicated self-perform division that focuses on improving productivity and reducing costs for our customers.

Certified Welders

**Machinery Installation
and Alignment**

Crane Operators

ADVANTAGES OF SELF-PERFORM

Schedule: One of the biggest causes of project delays is inadequate staffing by trade partners on critical path activities. By having this portion of the work performed by our own union-trained tradespeople, we can guarantee that we have the necessary labor force in place to deliver the work on time.

Quality: All Boldt tradespeople are trained to the high standards of the unions to which they belong; this, combined with Boldt's industry-leading QA/QC program and our own Built-in Quality planning and approach, consistently results in exceptional quality work with far fewer instances of rework or call-backs than other firms.

Safety: It's ingrained into everyone at Boldt, from the laborer who started last week, to the 30-year veteran ironworker. Because of our rigorous safety program and holistic approach to training, our craftspeople experience significantly lower injury rates than the national average. This means happier, safer employees, fewer lost-time incidents and lower insurance costs — all of which directly benefit our clients.

OUR EQUIPMENT

Boldt has an extensive catalogue of tools and equipment that we own and operate. From hand tools to powertools, forklifts to cranes, Boldt has the resources that can limit down time waiting for rental equipment to be available and allows Boldt's operators who are well seasoned with using the equipment the ability to be safer and more efficient.

** Full equipment list available upon request*

2.7 QUALIFICATIONS & EXPERIENCE

HEALTH & SAFETY POLICY

It's our mission to protect everyone related to a project from injury — employees, subcontractors, customer employees and any site visitors. That requires more than compliance with safety regulations. It means creating a culture where safety is at the forefront of all that we do. That's why we've developed SafeThinking — a comprehensive program designed to help us achieve zero injuries or incidents on the job. SafeThinking® includes:

- Continuous positive reinforcement for safe behaviors and hazard recognition
- Planning efforts, processes and checklists that minimize on-the-job risks
- Ongoing hazard assessments to ensure safe practices
- Communication and training activities that educate the workforce on hazard avoidance
- Predictive technology and analytics to prevent incidents before they happen

QA/QC POLICY

Unlike traditional approaches to QA/QC, which focus on addressing quality issues on the project, after the work has been finished, Boldt's approach eliminates quality issues before they occur by planning each scope of work in advance. This is achieved through a Lean process called Built-in Quality (BiQ) which the Boldt Production System manages as "Make Work Ready".

Make Work Ready treats all defects, errors and quality issues as avoidable, provided the right steps are taken early. Through this process, we avoid unpleasant and potentially costly surprises during construction or during closeout and keep our projects running smoothly, from start to finish.

Boldt has a robust health & safety policy that is constantly evolving to maintain its standing as a leader in the industry.

2.8 KEY PERSONNEL QUALIFICATIONS

AARON UTLEY

Project Executive

Aaron brings his strong project management skills and communication abilities to every project, creating a unified team between the owner, architects, engineers, and subcontractors. In leading project teams, his approach has delivered projects that exceed owner satisfaction by completing projects on or ahead of schedule and within or below budget. Aaron’s ability to foster teamwork, create a common goal, while having transparent communication are key drivers for successful and efficient projects.

KEITH WILMER

Regional Safety Director

Keith is a very experienced and knowledgeable safety representative. He plays a key role in safety development and job site safety compliance. He is responsible for managing job site safety including safety audits, which are conducted on a regular basis to ensure projects are performing accordingly to establish safety policies and best practices. Along with having a strong background in policy and procedure development, Keith conducts safety training for all applicable personnel, corrects at-risk behaviors and mitigates hazards. All these duties, along with coaching and mentoring of employee's are key components to ensure OSHA, Boldt, and your safety program compliance.

BRANDON PECK

Regional Quality Manager

Having over 28 years of experience working with utility and energy companies throughout the U.S. and Canada, Brandon has an extensive knowledge of what it takes to build and provide project support at these complex facilities. He provides quality management for the Minnesota Operations construction projects and provides the leadership to implement the Boldt quality management policies and procedures necessary to complete any project within the standards established by the engineer's specifications, federal, state and local codes. His focus is creating and implementing a world class quality management program at Boldt.

4.0 WORK PLAN FOR SCOPE OF SERVICES

WORK PLAN FOR SCOPE OF SERVICES

Emergency repairs, minor updates, and routine maintenance: not every project requires a bulldozer, but it does require exceptional care, quality, and attention to detail that delivers reliable, safe, cost-effective improvements. Boldt has reliably installed, maintained, and rebuilt America's manufacturing equipment for half a century.

As part of our comprehensive services, we perform complex and highly technical optical and laser alignment to ensure your machinery is installed to the manufacturer's tolerances, runs at its peak efficiency, and reaches its expected lifespan. Boldt will communicate with the facility on the various jobs' specifics and assign lead tradespeople to each job. The lead will develop the safety and work plan and communicate with the plant on job progress.

OUR PEOPLE

Since Martin Boldt started his carpentry shop in 1889, the Boldt name has been synonymous with craftsmanship and quality. We proudly continue that tradition as a leading self-perform construction company, with our local union tradespeople who provide a wide range of disciplines including millwrights, ironworkers, boilermakers, carpenters, operators and laborers. We are able to supplement sheet metal work with our boilermaker workforce and have trusted partners who supply us with fabrication when needed.

SAFETY PLANNING

Boldt builds safety into all of our work. Safety starts before mobilization, where all employees will complete computer-based safety training. Once at the site, employees will complete site-specific safety training before beginning any work. Along with safety orientations, Boldt crews will complete daily safety task analysis for each work scope, discussing the work plan, identifying any hazards, and discussing how to eliminate them. Boldt prides itself in its safety planning and our safety record.

PROJECT/SHUTDOWN PLANNING

Planning is the key to a safe and efficient project. Boldt understands this and starts planning for shutdowns and projects before mobilization. Once the project scope is identified, Boldt will work collaboratively with Ramsey/Washington to ensure we maintain all of their ongoing production/operations.

REPAIRS AND MAINTENANCE

Boldt maintains a staff of qualified and caring tradespeople who understand the value of your equipment. Additionally, Boldt provides extensive maintenance, installation, and alignment services throughout the United States on both a scheduled and emergency basis. Other services include machine surveys, vibration, optical alignment, analysis, and troubleshooting to get your manufacturing equipment performing its best.

OUR PROPOSAL IS BASED UPON REACHING MUTUALLY ACCEPTABLE CONTRACT TERMS AND CONDITIONS. BELOW ARE ITEMS TO CONSIDER:

1. Indemnity – We suggest further clarity for a mutually acceptable indemnification provision which is limited to third party claims and then only to the extent those claims are caused by Boldt's acts or omissions.

2. Consequential Damages – We propose that consequential damages language be inserted to clearly establish a mutual waiver of consequential damages.

3. Force Majeure – We would like to discuss the language regarding relief for Force Majeure events and our ability to request compensation for time and cost.

4. Differing Site Conditions – We would like to discuss how differing site conditions would be addressed in the contract.

5. Hazardous Materials – We would like to discuss how pre-existing hazardous materials would be addressed in the contract. Remediation of any pre-existing hazardous materials is assumed to be done by others, if needed. This includes encountering asbestos and any requirements to provide insurance for encountering any such hazardous materials

6. Builder's Risk / Waiver of Subrogation – Builders risk and waivers of subrogation do not appear to be addressed. We would like to discuss how these items are addressed.

7. Warranty – We would like to discuss the warranty obligations to clarify that Boldt will perform work in accordance with the requirements outlined in drawings, specifications and scope of work documents applicable to the work. We will warrant against defects in our work for a period of one-year after acceptance.

8. Insurance – We would like to identify a specific additional insured form in the agreement. We recommend CG 20 10 07 04 and CG 20 37 07 04. It is in both parties' best interest to specify these forms.

Ramsey/Washington Recycling & Energy
Request for Proposal

Attachment 3 – Contractor Application for Designation of Trade Secret Information

Solicitation Title Specialized Labor Services

The submitted quote/proposal/proposal includes trade secret information that we, the contractor, believe to be classified as nonpublic (relating to a non-person) or private (relating to a person) information under §13.37 of the Minnesota Government Data Practices Act. Note that typically proposed pricing is not considered trade secret information.

As such, we are requesting that certain provisions of our quote/proposal/proposal response, as indicated below, be treated as trade secret data and that any request for access to the trade secret data be handled in accordance with the provisions of R&E's Purchasing Standard Terms and Conditions.

Section(s) 2.3; 2.10

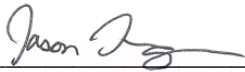

Page #s: 3-4; 16-17

Topic(s): Summary of Claims, Labor Rates

We understand that a decision regarding this request will be made by R&E prior to award. If this classification request is granted, in the event the designation of this information as trade secrets is challenged, we agree to defend, indemnify, and hold harmless R&E against any claims related to the designation of this data as trade secrets data.

We further understand that R&E considers markings of "confidential" or "trade secrets" in the solicitation response to be insufficient to classify information in a response. We agree to indemnify and hold R&E harmless from any damages arising out of the release of any materials or data unless they are specifically identified above.

Equipment Rental Rates

Rates as of Date: 06/07/2023

RATE

The Boldt Company has compiled the information to be consistent with the general industry practices for equipment rental and our rates have been adjusted to correspond to these conditions.

Boldt Equipment bases rates on one shift of 8 hours per day, 40 hours per week, or 166 hours per month. Rental rates are "bare rates" and do not include costs of operators, delivery, fuel, or lubricants. Rental rates for newly purchased pieces of equipment are established at the time of purchase and replacement values are updated as market conditions dictate and added to the rental rate table.

Rental rates are subject to change until a contract is signed, thereafter rates are adjusted annually (on or around June 1st), unless contract specifies otherwise.

At no time does Boldt Equipment become property of the Owner.

RENTAL PERIOD

Rental period begins when equipment leaves the Boldt warehouse or yard and stops when it is returned.

TAXES & INSURANCE

No license, sale or use taxes are included in Boldt Equipment rates. Insurance is provided under Boldt's corporate program.

CONDITION OF EQUIPMENT

On Site Maintenance & Repair: The equipment rented will be delivered to the Project site in good operating condition and is to be returned to the yard in the same condition as delivered, less normal wear. All maintenance and repair while on the Project site will be job chargeable, including but not limited to:

- Damage, repair, and maintenance to Boldt vehicles when assigned to the Project.
- Damage, repair, and maintenance to any lifts when assigned to the Project.
- Damage, repair, and maintenance to any jobsite trailers when assigned to the Project.

Prior to the end of the rental period, the Project shall complete its obligations with respect to minor repair and routine maintenance.

Final Inspection & Repair: Boldt Equipment shall perform a final inspection after equipment has been returned by the Project. This inspection and estimate of required repairs, if any, shall form the basis for allocation of any final repair costs between Boldt Equipment and the Project. Equipment returned damaged from the Project site will be repaired on a time and material basis at the Project's expense. In situations where equipment is working in a hazardous waste or toxic chemical area, machines should be cleaned at the expense of the Project before being returned from rental.

FREIGHT CHARGES

The rates in the schedule are all f.o.b. the Boldt warehouse or shipping point. Boldt, at its own expense, shall load the equipment for transit to the Project and upon its return unload it, and shall pay all demurrage charges accruing at its own shipping or receiving point. The Project, at its own expense, shall do all unloading, installing, dismantling and reloading, and shall pay all demurrage accruing at its own shipping or receiving point, and all freight in both directions; providing, however, that unless otherwise specifically agreed, the Project shall not pay return transportation charges greater than those necessary to move the equipment to the location from which it was received.

MISSING/STOLEN EQUIPMENT

Equipment either missing or stolen from a jobsite must be reported to Boldt's Construction Equipment/Vehicles group in a timely fashion. A Missing/Stolen Tool Report must be completed and returned to the attention of the Construction Equipment/Vehicles and Risk Management groups and stored in the job file. A police report must be filed for any theft. A copy of the police report must be attached to the Missing/Stolen Tool Report. All missing or stolen equipment will be job chargeable at the replacement value of that equipment.

MANUAL EQUIPMENT CHARGES

The manual process is used to charge Semi tractors and trailers, Yard Stake Truck, Concrete Conveyor, Concrete Pump Truck, and Truck Cranes. These items are not typically transferred to projects. The concrete conveyor and pump trucks have a standard price for all jobs of \$1,500 per day based off 8 hours a day, includes the operator, equipment, and fuel. Anything over 8 hours is OT and will be charged out at an additional hourly rate. Truck cranes are charged out at an hourly rate with a minimum of 4 hours with 8 hours being the daily rate. Anything over 8 hours is OT and will be charged out at an additional hourly rate.

Labor Hour Equipment CHARGES

This process is used when equipment and/or vehicles assigned to an employee are charged to projects according to the employee's labor hours entered. Under certain circumstances, a project agreement may set replacement value caps, discounts, or cutoffs for certain charges. Leased vehicles that are charged based on an employee's recorded hours will not be subject to any set caps, discounts, or cutoffs. However, eligible equipment that is charged based on an employee's recorded time will accommodate for discounts and small tool cutoffs, but the replacement value cap will not apply.

RECYCLING & ENERGY**
CONNECTING VALUE TO WASTE

R&E BOARD MEETING DATE:		March 28, 2024				AGENDA ITEM:		VI.c	
SUBJECT:		Food Scrap Bag Sortation Services Agreement							
TYPE OF ITEM:		<input type="checkbox"/>	INFORMATION	<input type="checkbox"/>	POLICY DISCUSSION	<input checked="" type="checkbox"/>	ACTION	<input type="checkbox"/>	CONSENT
SUBMITTED BY:		Joint Leadership Team (JLT)							

R&E BOARD ACTION REQUESTED:

1. Approve the Transload and Food Scrap Bag Sortation agreement with Walter's Recycling and Refuse, Inc.
2. Authorize the Joint Leadership Team to execute a Transload and Food Scrap Bag Sortation Agreement with Walter's Recycling and Refuse, Inc. following approval as to form by the County Attorney.

EXECUTIVE SUMMARY:

Transload agreements create a business relationship between R&E and private-sector transfer stations serving the Ramsey and Washington county service area. By making these transfer stations available to Ramsey and Washington county waste haulers, haulers can minimize the distance between their routes and the delivery location. R&E then manages the transportation of the waste from the transfer station to the R&E Center to process waste into refuse-derived fuel.

On December 31, 2022, R&E's previous five-year transload agreements with five transfer stations expired. At this same time, staff knew that as the Food Scraps Pickup Program rolled out to all Ramsey and Washington county communities, R&E would need to procure capacity for sorting FSBs at locations beyond the R&E Center. R&E staff determined it would be best to enter into "bridge" transload agreements with R&E's current transfer station partners starting in 2023 to ensure no disruption for haulers that use transfer stations to deliver Ramsey/Washington county waste. The R&E Board approved this approach at its December 15, 2022, meeting. Since then, R&E staff has worked toward developing partnerships with transfer stations to sort FSBs. To achieve this, R&E issued a request for proposals (RFP) for transload sortation of food scraps.

The proposed transload and sortation agreement with Walters Recycling and Refuse, Inc. will replace the existing transload agreements in the northern service areas for Ramsey and Washington Counties. The proposed agreement will allow Ramsey and Washington Counties to expand the Food Scraps Pickup Program to communities that deliver waste to transfer stations located in Blaine, MN. Upon execution of the proposed transload and sortation agreement, permitting, design, construction and installation of FSB sortation equipment, R&E will terminate transload agreements with transfer stations in the Blaine area that do not offer FSB sortation services.

This agreement is a result of the RFP issued on November 7, 2022. Extended time was needed to evaluate FSB sortation service proposals covering all of Ramsey and Washington Counties to support the Food Scraps Pickup Program. It is anticipated that construction and installation of FSB sortation

SUBJECT: Food Scrap Bag Sortation Services Agreement

equipment at Walters' existing transfer station will take an estimated 18 - 24 months from the time the proposed transload and sortation agreement is executed.

Transload Services

The transload agreement component of the proposed contract with Walters Recycling and Refuse covers the following services:

- Allows the contracted transfer station to receive Ramsey/Washington waste from haulers that have entered into a waste delivery agreement with R&E.
- Offers an alternative for haulers, allowing them to avoid direct hauling waste to the R&E Center.
- Provides the process for Ramsey/Washington waste to be transported from contracted transfer stations to the R&E Center using R&E contracted transfer vehicles and trailers.
- Describes the process for reporting, invoicing and payment between R&E and contracted transfer stations.

Sortation Services

The sortation agreement component of the proposed contract with Walters Recycling and Refuse covers the following services:

- Requires the operator to install equipment that physically identifies and separates the FSBs from Acceptable Waste.
- Requires the operator to be capable of processing at least 50,000 tons of Acceptable Waste containing FSBs annually.
- Outlines R&E's financial put or pay obligation for sorting 50,000 tons of Acceptable Waste containing FSBs annually.
- Ensures all efficiency and purity rates of FSB removal are met as established by the contract.
- Describes operator responsibility for all labor, as well as purchasing, maintaining and troubleshooting any equipment necessary for the FSB sorting.
- Ensures that incoming acceptable loads containing FSBs are not inadvertently sent to landfill, once this agreement is executed, and that sorting non-Ramsey/Washington loads using the FSB sortation line or delivering "like tons" to R&E is not allowed.
- Outlines early termination charges if either Walter's or R&E is the defaulting party to this agreement.

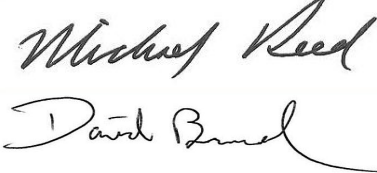

ATTACHMENTS:

1. Draft Resolution
2. Draft Transload and Food Scrap Bag Sorting Services agreement

FINANCIAL IMPLICATIONS:

Estimated annual sortation expenses at Walter's Recycling and Refuse, Inc. transfer station is \$2,300,000 per year starting when construction and installation of sortation equipment is finished, estimated to be in Q4 2025. The R&E Board may need to amend the current 2025 approved budget to include sortation expenses. This agreement also includes transload services that are already included in the approved 2024-2025 budget, which is estimated at \$725,000.

RESOLUTION R&EB-2024-06

Food Scrap Bag Sortation Services Agreement

WHEREAS, The Ramsey/Washington Recycling & Energy Board (“R&E Board”) is governed by the Amended and Restated Joint Powers Agreement by and between Ramsey County and Washington County dated July 18, 2023 (“Joint Powers Agreement”); and

WHEREAS, Ramsey and Washington Counties have committed to continue to protect and ensure the public health, safety, welfare and environment of each county’s residents and businesses through sound management of solid and hazardous waste generated in each county; and

WHEREAS, Transload agreements create a voluntary business relationship between R&E and five private-sector transfer stations serving the Ramsey and Washington County service area that allows waste haulers who have signed Waste Delivery Agreements to minimize the distance between their routes and the waste delivery location, provides the process for R&E designated waste to be transported from transfer stations to the Ramsey/Washington Recycling & Energy Center (“R&E Center”) using R&E contracted transfer vehicles and trailers, and describes the process for reporting, invoicing and making payment between R&E and contracted transfer stations; and

WHEREAS, the Food Scraps Pickup Program provides food scraps recycling service to all residents of Ramsey and Washington counties by providing food scrap bags to households, which are co-collected with trash and sorted upon being delivered to the R&E Center or a transfer station; and

WHEREAS, The current five-year transload agreements with contracted transfer stations do not include sortation services for the Food Scraps Pickup Program; and

WHEREAS, New transload agreements with sortation services will replace agreements without sortation services in designated service areas; and

WHEREAS, R&E issued a request for proposals to enter into partnerships for food scrap bags to be sorted at transfer stations; and

WHEREAS, R&E staff evaluated proposals for food scrap bag sortation services and recommends entering into a transload and sortation agreement with Walter’s Recycling and Refuse, Inc., with a ten-year duration starting from the date of execution. NOW, THEREFORE, BE IT

RESOLVED, The R&E Board hereby approves the Transload and Food Scrap Bag Sortation agreement with Walter’s Recycling and Refuse, Inc. BE IT FURTHER

RESOLVED, The R&E Board authorizes the Joint Leadership Team to execute the Transload and Food Scrap Bag Sortation Agreement with Walter’s Recycling and Refuse, Inc. following approval as to form by the County Attorney.

Ramsey/Washington Recycling & Energy Board

Contract Number: RESFA001950

Contractor Name: Walter's Recycling and Refuse, Inc.

Vendor ID: 0000079600

CERT SBE SVN:

Department: Facility

Contract Authority/Resolution: Resolution

Resolution #: R&EB 2024-XX

Good/Service Type: Transload Services

Contract Description: Transload Station Services

Contract Type: Rate Setting

Estimated Annual Expense: \$2,300,000

Funding Notes: TBD

Original Contract Begin Date: Upon Execution

Contract End Date: At the end of the ten-year operational period, which will commence as mutually agreed upon after the start-up construction/permitting period.

Comments:

Walter's Recycling and Refuse, Inc. will provide transload and sortation services to R&E. Minimum payment obligation of 50,000 tons sorted per year.

TRANSLOAD AND FOOD SCRAP BAG SORTING SERVICES AGREEMENT

THIS AGREEMENT (“**Agreement**”) is made and entered into this ____ day of _____, 2024 (the “**Effective Date**”), by and between the Ramsey/Washington Recycling & Energy Board hereinafter referred to as (“**R&E**”), a joint powers board comprised of Ramsey and Washington Counties (collectively, the “**Counties**”), and Walter’s Recycling and Refuse, Inc., with its principal place of business at 2830 101st Ave NE, Blaine, MN 55449 (“**Operator**”), each a “**Party**” and together the “**Parties**”.

RECITALS

WHEREAS, the State of Minnesota by the enactment of the Minnesota Waste Management Act, Minn. Stat. Chapter 115A and Minn. Stat. Chapter 473, has declared that it is the State’s policy to improve *MSW* (as defined below) management through the separation and recovery of energy and materials from MSW and through the reduction of disposal of such waste; and

WHEREAS, R&E desires to promote the State’s MSW policy, in part, through recovery of resources from MSW at the Ramsey/Washington Recycling & Energy Center (the “**R&E Center**”), located at 100 Red Rock Road, Newport, Minnesota; and

WHEREAS, the Counties have implemented Waste Designation Ordinances as provided for in Minnesota law, i.e., Minn. Stat. 115A.80 (collectively, “**Solid Waste Ordinances**”); and

WHEREAS, the Counties have also implemented an organic food scrap collection program under which *Food Scrap Bags* (as defined below) are used by residents of the Counties (collectively, “**Residents**”) to separate their organic food scraps from their other MSW. Such Food Scrap Bags are then placed by Residents in the same collection cart as MSW for collection by waste haulers and delivery to the R&E Center or transfer stations under contract with R&E; and

WHEREAS, Operator operates a transfer station for MSW, called the Walter’s Recycling and Refuse Transfer Station, located at 10191 Xylite Street NE, Blaine, MN 55449 (the “**Transfer Station**”);

WHEREAS, R&E has also negotiated voluntary waste delivery agreements with certain waste haulers (“**Contract Haulers**”) that allow waste haulers under contract with R&E to use transfer stations under contract with R&E at no additional charge and in addition, has agreed to provide Operator a current list of such Contract Haulers (“**Approved Hauler List**”); and

WHEREAS, it is anticipated that certain Contract Haulers will deliver *Acceptable Waste* (as defined below) to the Transfer Station; and

WHEREAS, R&E desires for Operator to provide transload and *FSB* (as defined below) sortation services for all *Acceptable Waste* generated in the Counties delivered to the Transfer Station by Contract Haulers pursuant to the terms and conditions as provided herein;

NOW, THEREFORE, in consideration of the mutual promises and conditions contained herein, the Parties hereby agree as follows:

1. RECITALS. Each of the Parties hereto agrees that the Recitals set forth above are true and correct and are incorporated into this Agreement.

2. DEFINITIONS. As used herein, the following terms shall have the following definitions:

2.1 **“Acceptable Waste”** means *Solid Waste* (as defined below) generated in the Counties that is acceptable at the R&E Center, which is not otherwise *Unacceptable Waste* (as defined below). *Acceptable Waste* shall also include *Incidental Waste* (as defined below). *Acceptable Waste* may also include “like tons” received at the Transfer Station that were collected outside of the Counties to replace tons generated in the Counties and are acceptable at the R&E Center. During the *Operational Period* (as defined below), “like tons” shall not replace tons of *Acceptable Waste* generated in the Counties that may contain *Food Scrap Bags* (as defined below).

2.2 The Parties acknowledge that there will be times when small amounts of *Solid Waste* generated in other counties, referred to as **“Incidental Waste,”** is collected by the Contract Haulers along with *Acceptable Waste* for operational and routing efficiency. The Parties agree that the related delivery of small amounts of *Incidental Waste* to the Transfer Station is allowed under this Agreement and the agreement R&E have with their Contract Haulers.

2.3 **“Mixed Municipal Solid Waste”** or **“MSW”** means garbage, refuse, and other *Solid Waste* from residential, commercial, industrial, and community activities that the generator of the waste aggregates for collection. It does not include auto hulks, street sweepings, ash, construction debris, demolition waste, mining waste, sludges, tree and agricultural wastes, tires, lead acid batteries, used oil, and other materials collected, processed, and disposed of as separate waste streams.

2.4 **“Recyclable Materials”** means materials that are separated from *MSW* for the purpose of recycling or composting, including paper, glass, plastics, metals, automobile oil, batteries, source-separated compostable materials, and sole source food waste streams that are managed through biodegradative processes. Refuse-derived fuel or other material that is destroyed by incineration is not *Recyclable Material*.

2.5 **“Solid Waste”** has the meaning provided in the Counties’ *Solid Waste Ordinances*.

2.6 “**Unacceptable Waste**” means waste that is not acceptable at the R&E Center as further defined in the Counties’ Solid Waste Ordinances. The R&E Center shall have available a current list of Unacceptable Waste.

2.7 “**Food Scrap Bag**” or “**FSB**” means the heavy-duty compostable bag used by Residents for source separation of organic food scraps that are then secured by Residents and placed in the same collection cart with their other MSW.

2.8 “**Food Scrap Bag Program**” means the FSB collection program undertaken by R&E.

2.9 “**Start-up Period**” means that period of time necessary for Operator, working cooperatively with R&E, to: (a) get the Transfer Station properly permitted so that Operator may provide the services as required hereunder, (b) order, receive and install the necessary *Separation Equipment* (as defined below) to be installed at the Transfer Station for the purposes of separating and removing FSBs from all other MSW, and (c) to ensure such Separation Equipment, as installed, functions in the manner as required of it under the terms of this Agreement. The Start-up Period begins on the Effective Date and shall end on the last day of third complete calendar month next following the day the Parties mutually agree in a writing signed and dated by the Parties, that the Separation Equipment is fully functional.

2.10 “**Operational Period**” means that period of time beginning on the first day of the month following end of the Start-up Period and continuing thereafter for a period of ten (10) years. The Parties shall document the beginning of the Operational Period in writing signed and dated by the Parties. The obligation of Operator to provide the separation and transload services for FSBs as more fully described herein shall begin on the first day of the Operational Period.

2.11 “**Separation Equipment**” means the equipment and operating system Operator will acquire, install and employ at the Transfer Station to enable Operator to efficiently and effectively separate FSBs from all other MSW.

2.12 “**Feedstock**” means the FSBs and the contents thereof that are separated from all other MSW and delivered to R&E pursuant to the terms of this Agreement.

3. OPERATOR TO PROVIDE TRANSLOAD SERVICES. R&E hereby engages Operator to provide transload services (“**Transload Services**”) for all Acceptable Waste delivered to the Transfer Station as follows:

3.1 Operator shall receive, weigh and manage Acceptable Waste delivered to the Transfer Station by Contract Haulers in accordance with all operating permits, laws and regulations, as well as non-licensed self-haulers that deliver Acceptable Waste generated in R&E. Operator shall deny access to any licensed hauler not on the Approved Hauler List and shall notify these haulers that they must deliver waste directly to the R&E Center. The weight as determined by Operator’s scales at the Transfer Station, with such scales being certified by the State of Minnesota, shall be conclusive for billing purposes.

3.2 Any Contract Hauler that desires to utilize the Transfer Station shall have access to the Transfer Station during the Transfer Station's operating hours unless the Transfer Station has reached its maximum storage capacity for the day under its state or local permits. Failure to provide such access by Operator shall be a material breach of this Agreement unless the Contract Hauler has violated, or is in violation of, the Transfer Station's reasonable rules and regulations. R&E shall provide Operator with the Approved Hauler List and notify Operator in writing at least ten (10) days of any changes to the list, providing Operator, at such time, with the revised Approved Hauler List.

3.3 Acceptable Waste generated in the Counties delivered by non-licensed self-haulers shall be charged at the same rate charged for self-haulers at the R&E Center and R&E shall be responsible for transporting such Acceptable Waste to the R&E Center.

3.4 Operator shall load the Acceptable Waste into transfer vehicles provided by R&E. R&E shall take title to the Acceptable Waste upon delivery of the Acceptable Waste to the Transfer Station and R&E shall be solely responsible for all costs of transportation to the R&E Center. R&E shall provide a sufficient number of trailers to handle the Acceptable Waste. Should R&E fail to do so, Operator shall make reasonable arrangements for additional trailers to transport the Acceptable Waste at R&E's sole expense and may charge R&E for the cost of such arrangements.

3.5 Operator shall provide to R&E a computer file on a weekly basis that includes the total amount, measured in tons, of Acceptable Waste transloaded by Operator to the R&E Center, ticket and tonnage information for Contract Haulers and non-licensed self-haulers, as well as county of origin and dates and approximate times of delivery, in a form that can be uploaded by R&E for invoicing and other purposes. Inbound and outbound volumes of Acceptable Waste shall be substantially equivalent as determined on a monthly basis.

3.6 Operator agrees to provide, at its expense, all necessary personnel and equipment (and all costs related thereto) to properly perform the Transload Services.

3.7 Operator may, in its sole discretion, refuse any Acceptable Waste generated in the Counties if it has reason to suspect that the waste contains hazardous waste, Unacceptable Waste or otherwise presents safety concerns. Should Operator reject a load of waste, it shall notify R&E in writing about the rejection, including the basis of the rejection, the name of the hauler, the date, time and weight of the rejected load. In addition, Operator may, in its sole discretion, refuse any Acceptable Waste generated in the Counties if the Contract Hauler has violated, or is in violation of, the Transfer Station's reasonable rules and regulations.

3.8 For the avoidance of doubt, Operator acknowledges that the Transload Services applies only to the Acceptable Waste and Incidental Waste delivered by Contract Haulers.

4. OPERATOR TO PROVIDE FSB SEPARATION SERVICES. R&E hereby engages Operator to provide services to separate FSBs from Acceptable Waste (the "**Separation Services**") as follows:

4.1 The Parties shall work together to develop a mutually acceptable implementation plan outlining when and how Operator will move forward towards the Operational Period, including a project schedule (the “Implementation Plan”). During the Startup Period, on a monthly basis, Operator agrees to provide R&E with written Implementation Plan progress reports.

4.2 Throughout the Operational Period, Operator, at its sole cost and expense, shall:

4.2.1 Process all Acceptable Waste it receives at the Transfer Station through the Separation Equipment;

4.2.2 Load the accumulated FSBs into R&E trailers for transportation to a destination facility as determined by R&E. R&E, at its sole cost and expense, shall provide transportation of FSB trailers to the destination facility;

4.2.3 Manage all Acceptable Waste remaining after the removal of FSBs to Section 3 above; and

4.2.4 Provide weekly reports to R&E, identifying the number of tons of MSW that went through processing at the Transfer Station and the outbound weights, measured in tons, of FSBs loaded into R&E’s trailers. In addition, if the Separation Equipment has the capacity to collect the following data, it shall also be reported to R&E on a weekly basis: the number of FSBs targeted in the number of FSBs picked.

4.3 During the Operational Period:

4.3.1 Operator shall, at its sole cost and expense, undertake commercially reasonable efforts, including training its staff and maintaining the Separation Equipment, to ensure that the efficiency of FSB removal and purity specifications as detailed in **Exhibit A** are satisfied. Upon R&E’s written request but no more frequently than semiannually, Operator shall conduct testing to demonstrate such compliance with the Operational Standards. Results of such testing shall be provided to R&E.

4.3.2 On no more frequently than a semi-annual basis, upon R&E’s reasonable advance written request and subject to all safety rules and regulations, R&E may, at its sole cost and expense, conduct audits of the Separation Equipment’s removal efficiency and purity. Audit methodology for determining removal efficiency and purity shall be to process a minimum of ten (10) tons of Acceptable Waste delivered to the Transfer Station, sort through remaining Acceptable Waste after the FSB removal process to determine if FSBs were missed, and determine rate and purity based on the FSBs removed compared to the FSBs missed.

4.3.3 Upon reasonable advance notice and subject to all safety rules and regulations, R&E or its designee shall be allowed to visit and inspect the Transfer Station periodically to review the process and discuss any operational issues.

4.4 If, during the term of this Agreement, new technology or equipment is developed that would significantly improve the efficiency and/or effectiveness of the FSB sorting and separation

process, the Parties agree to discuss such new technology and/or equipment and if so desired, negotiate appropriate amendments to this Agreement in good faith.

5. RULES AND REGULATIONS AT THE TRANSFER STATION. Operator may implement and enforce reasonable rules and regulations concerning utilization of the Transfer Station, for the safe, legal and efficient operation of the facility. R&E agrees to conform to all reasonable rules and regulations as they may be implemented and amended from time to time and require all Contract Haulers to do the same. If an R&E vehicle becomes incapacitated or unable to move while at the Transfer Station, Operator may, but is not obligated to, provide assistance in moving the vehicle. R&E's driver or agent shall make any necessary equipment connections to R&E's vehicle and R&E expressly agrees that Operator, its employees and agents shall have no liability for any damage while providing such assistance. Operator may charge, and R&E shall pay, a reasonable fee for providing such assistance.

6. TERM. The term of the Agreement shall begin on the Effective Date and shall end at the expiration of the Operational Period. Upon the mutual agreement of the Parties, this Agreement can be renewed for up to five additional years or as otherwise agreed in writing between the Parties.

7. COMPENSATION.

7.1 On or about the first of each month, Operator shall email R&E a detailed invoice for the amount due and owing by R&E to Operator for the prior month's *Transload Fee* and *FSB Fee* (as such terms are defined below). Such invoice shall be due and payable by R&E within thirty-five (35) calendar days after the date such invoice is emailed to R&E. The invoice shall be emailed to invoices@recyclingandenergy.org and R&E agrees to notify Operator in writing as to any change in its account payable email address. Operator may not submit invoices to R&E more than once a month. Payment of interest and disputes regarding payment shall be governed by the provisions of Minnesota Statutes § 471.425.

7.2 The "**Transload Fee**" due Operator shall be calculated as follows: Total number of tons of Acceptable Waste received from Contract Haulers and non-licensed self-haulers that are transloaded by Operator pursuant to this Agreement during such calendar month multiplied by Eleven Dollars and Nine Cents (\$11.09) per ton (the "**Transload Processing Rate**").

7.3 The "**FSB Fee**" due Operator shall be calculated as follows: Total number of tons of Acceptable Waste received from Contract Haulers and non-licensed self-haulers during such calendar month multiplied by FSB processing fee of Thirty-four Dollars and Thirty-eight Cents (\$34.38) per ton (the "**FSB Processing Rate**"). Notwithstanding anything set forth herein to the contrary, the FSB Fee due and payable to Operator at the end of each calendar quarter (March 31, June 30, September 30 and December 31) during the Operational Period shall be based on the greater of: (a) the actual number of tons of Acceptable Waste received in the quarter or (b) twelve thousand five hundred (12,500) tons. If the cumulative tons of Acceptable Waste received from Contract Haulers and non-licensed self-haulers during any such calendar quarter is less than 12,500 tons, at the end of each calendar quarter Operator shall invoice R&E an amount equal to 12,500 tons less the tons previously billed R&E for the two first two months of that

calendar quarter multiplied by the then applicable FSB Processing Rate. For example, if Operator receives 4,000 tons of Acceptable Waste in both January and February and invoices R&E accordingly and then receives another 4,000 tons of Acceptable Waste in March, Operator shall invoice R&E for 4,500 tons in March even though it only received 4,000 actual tons in March ($12,500 - 8,000 = 4,500$). Similarly, if Operator receives 7,000 tons of Acceptable Waste in both January and February and invoices R&E accordingly and then receives another 1,000 of Acceptable Waste in March, Operator shall only invoice R&E for the 1,000 tons it actually received in March since the cumulative total of tons in that quarter ($7,000 + 7,000 + 1,000 = 15,000$ tons) exceeded the 12,500-ton minimum. The FSB Fee shall be in addition to the Transload Fee described above.

7.4 Beginning on January 1, 2025, and continuing on the 1st of January each and every year thereafter, the Transload Processing Rate and the FSB Processing Rate shall be adjusted by the percentage change in the Consumer Price Index, All Urban Consumers (CPI-U), Midwest Region, for the immediately preceding year.

8. INDEMNIFICATION. Notwithstanding any other provision to the contrary, each Party shall indemnify, hold harmless, and defend the other, its officers, employees and agents for any and all claims which the indemnified Party, its officials, agents, or employees may hereafter sustain, incur or be required to pay, to the extent caused by any negligent act or omission of the indemnifying Party, or its subcontractors, and their officers, agents or employees, in the execution, performance, or failure to adequately perform the indemnifying Party's obligations pursuant to this Agreement.

9. INSURANCE REQUIREMENTS. Operator agrees that in order to protect itself as well as R&E, under the indemnity provisions set forth above, it will at all times during the term of this Agreement keep in force policies of insurance covering the following liabilities, in an amount at least that of R&E's liability limits set forth in Minn. Stat. Chapter 466 or greater as set forth below.

9.1 Commercial General Liability with contractual liability coverage in the amount of \$2,000,000 per occurrence, \$4,000,000 general aggregate. The R&E Board, its officials, employees, and agents shall be added to the policy as an additional insured on a primary and non-contributory basis with respect to the ongoing and completed operations of Operator, using ISO endorsement form CG 20 26 and CG 20 37 or the equivalent. R&E may accept a blanket ISO endorsement (forms CG2038 and CG2039 or the equivalent) at its discretion. The policy endorsement must be provided with the Certificate of Insurance for review and approval by R&E. Primary and non-contributory language must be so noted on the Certificate of Insurance. Operator must provide a copy of the Primary and Noncontributory-Other Insurance Condition Endorsement upon request by R&E Board. Waiver of Subrogation is required and must be so noted on the Certificate of Insurance. R&E may accept a blanket form waiver of subrogation endorsement at its discretion. The policy endorsement must be provided with the Certificate of Insurance and the certificate must note the endorsement form is attached (and its corresponding endorsement number). An umbrella or excess policy over the primary liability insurance coverages is an acceptable method to provide the required insurance limits; however, the

umbrella/excess policy must follow form with no change in terms or conditions from the primary (underlying) policy and the Certificate of Insurance must state accordingly.

9.2 Workers' Compensation in the minimum amount of statutory limits as set forth at Minn. Stat. Chapter 176. Employer's Liability with limits of \$500,000/500,000/500,000. Waiver of Subrogation is required and must be noted on the Certificate of Insurance. R&E may accept a blanket form waiver of subrogation endorsement. The policy endorsement must be provided with the Certificate of Insurance and the certificate must note the endorsement form is attached (and its corresponding endorsement number).

9.3 Pollution Liability Insurance for liability arising out of property damage or bodily injury to third parties as a result of sudden and accidental pollution in an amount not less than \$1,000,000 per occurrence and in the aggregate. For claims arising from the discharge, dispersal release or escape or any irritant or contaminant into or upon land, any structure, the atmosphere, watercourse or body of water, including groundwater. This shall include on and off-site clean up and emergency response costs and claims arising from any disposal sites. If this policy is provided on a "claims made" basis, coverage shall be maintained for two (2) years after the term of this Agreement.

9.4 Operator agrees as a condition subsequent to increase the required insurance coverage in the event that the liability limits in Minn. Stat. § 466.04 increase. Nothing in this Agreement shall constitute a waiver by R&E of any statutory limits of liability. If, at any time during the insurance policy period applicable to each line of coverage above, the Operator's insurance limits have been exhausted, the Operator agrees to procure new coverage limits at specified limits of this Agreement.

9.5 Within thirty (30) days of the Effective Date of this Agreement, Operator will furnish R&E with a current and valid proof of insurance certificate indicating insurance coverage in the amounts required by this Agreement. As a condition subsequent to this Agreement, Operator shall insure that the certificate of insurance provided to R&E will at all times be current. The Parties agree that failure by Operator to maintain a current certificate of insurance with R&E shall be a material breach of this Agreement and payments on the Agreement shall be withheld by R&E until a certificate of insurance showing current insurance coverage in amounts required by the Agreement is provided to R&E. Any policy obtained and maintained under this clause (other than workers' compensation) shall provide that it shall not be cancelled, or not renewed, without thirty (30) days' written notice thereof to R&E and ten (10) days written notice shall be provided for non-payment of premium.

10. DATA PRIVACY. All data collected, created, received, maintained or disseminated by Operator in performing this Agreement shall be governed by the Minnesota Government Data Practices Act (Act), Minn. Stat. Ch. 13, as amended and Rules implementing the Act. When performing under this Agreement, Operator is subject to the requirements of the Act and Rules and must comply as if it is a governmental entity subject to the Act and Rules. The remedies contained in section 13.08 of the Act shall apply to Operator under Subd. 11(a).

11. RECORD DISCLOSURES/MONITORING. Pursuant to Minn. Statute 16C.05, subd. 5, the books, records, documents and accounting procedures and practices of Operator relevant to the Agreement are subject to examination by R&E, and either the legislative auditor or the state auditor, as appropriate. Operator agrees to maintain and make available these records for a period of six years from the date of termination of this Agreement.

12. NONDISCRIMINATION. Operator shall comply with and be subject to the requirements and conditions contained in Minn. Stat. Chapter 364 and Minn. Stat. section 181.59.

13. COMPLIANCE WITH LAW. Operator shall abide by all federal, state, or local laws, statutes, ordinances, rules and regulations now in effect or hereinafter adopted insofar as they relate to Operator's performance of the provisions of this Agreement. Failure to meet the requirements of this Section may be cause for cancellation of the Agreement effective the date of receipt of the notice of cancellation. Operator, at its own expense, shall secure and pay for all permits, fees, charges, duties, licenses, certifications, inspections, and other requirements and approvals as necessary for the execution and completion of this Agreement.

14. FIREARMS PROHIBITED. Unless specifically required by the terms of this Agreement, no provider of services pursuant to this Agreement, including but not limited to employees, agents, or subcontractors of Operator shall carry or possess a firearm on R&E Board premises or while acting on behalf of R&E pursuant to the terms of this Agreement. Violation of this provision shall be considered a substantial breach of the Agreement; and, in addition to any other remedy available to R&E under law or equity. Violation of this provision is ground for immediate suspension or termination of this Agreement.

15. INDEPENDENT CONTRACTOR. The Parties agree that Operator is acting as an independent contractor under this Agreement. Neither Operator nor its employees shall at any time be construed to be employees of R&E. Operator is responsible for its employees' compensation, fringe benefits and all insurance coverage.

16. SUCCESSORS, SUBCONTRACTING AND ASSIGNMENT.

16.1 Operator binds itself, its partners, successors, assigns and legal representatives to R&E in respect to all covenants, contracts and obligations contained in this Agreement.

16.2 Operator shall not enter into any subcontract for performance of any services contemplated under this Agreement nor novate or assign any interest in the Agreement without the prior written approval of R&E, which consent shall not be unreasonably withheld, delayed or conditioned. Any assignment or novation may be made subject to such reasonable conditions and provisions as R&E may impose. Operator is responsible for the performance of all subcontractors. Notwithstanding the foregoing to the contrary, in the event Operator sells its business, whether through a sale of its assets, the sale of its stock, a merger or some combination of thereof: (a) the failure of R&E to respond in writing within thirty (30) days of Operator's written request for such consent, shall conclusively be deemed R&E's consent to the

assignment of this Agreement to the acquiring party; and (b) if R&E denies its consent, it must also provide, in writing, the specific reasons for such denial.

17. NON-CONFORMING SERVICES. The acceptance of any non-conforming services under the terms of this Agreement by R&E or Operator shall not constitute a waiver of the accepting Party's right to conforming services or any rights and/or remedies in respect to any subsequent breach or default of the terms of this Agreement. The rights and remedies of R&E and Operator provided or referred to under the terms of this Agreement are cumulative and not mutually exclusive.

18. FORCE MAJEURE. Neither Party shall be liable for any loss or damage incurred by the other Party as a result of events outside the control of the Party ("**Force Majeure Events**") including, but not limited to: war, storms, flooding, fires, strikes, legal acts of public authorities, or acts of government in times of war, pandemic, epidemics, and national emergency that prevent local performance of this Agreement. The COVID-19 pandemic shall not be considered a Force Majeure Event unless government emergency orders related to the COVID-19 pandemic prevent or substantially hinder performance of this Agreement.

19. EARLY TERMINATION.

19.1 R&E may immediately terminate this Agreement if any proceeding or other action is filed by or against Operator seeking reorganization, liquidation, dissolution, or insolvency of Operator under any law relating to bankruptcy, insolvency or relief of debtors. Operator shall notify R&E upon the commencement of such proceedings or other action.

19.2 If either Party violates any material terms or conditions of this Agreement the other Party may, without prejudice to any right or remedy, give the offending Party, and its surety, if any, twenty-one (21) calendar days written notice of its intent to terminate this Agreement, specifying the asserted breach. If the offending Party fails to cure the deficiency within the twenty-one (21) day cure period, this Agreement shall terminate upon expiration of the cure period. If R&E is the defaulting party, it agrees to pay Operator the *Early Termination Fee* (as defined below). If Operator is the defaulting party, it agrees to pay R&E the damages according to 19.4.

19.3 Either Party may terminate this Agreement for repeated failure of the other Party to comply with material terms upon giving at least sixty (60) calendar days written notice thereof to the other Party. In such event, Operator shall be entitled to receive compensation for services provided in compliance with the provisions of this Agreement, up to and including the effective date of termination. In addition, if R&E is the defaulting party, it agrees to pay Operator the Early Termination Fee. If Operator is the defaulting party, it agrees to pay R&E the damages according to 19.4.

19.4 If R&E terminates this Agreement pursuant to Paragraphs 19.1 - 19.3 above, Operator shall be liable to R&E for R&E's actual damages incurred in retaining a third-party to provide the Transload and/or Separation Services as described herein for the remainder of the Term.

19.5 R&E may terminate this Agreement without cause by giving at least ninety (90) calendar days written notice thereof to Operator. In such event, Operator shall be entitled to receive compensation for services provided in compliance with the provisions of this Agreement, up to and including the effective date of termination. In addition, due to the significant and unique capital investment Operator has made in acquiring the Separation Equipment and in undertaking physical improvements to its premises designed to facilitate the performance of the Separation Services required of it hereunder, if R&E elects to terminate this Agreement without cause, R&E agrees to pay Operator the early termination fee as set forth in ***Exhibit B***, attached hereto and made a part hereof (the “**Early Termination Fee**”).

20. INTERPRETATION OF AGREEMENT; VENUE.

20.1 The Agreement shall be interpreted and construed according to the laws of the State of Minnesota. All litigation regarding this Agreement shall be venued in the appropriate State or Federal District Court in Ramsey County, Minnesota.

20.2 The provisions of this Agreement are severable. If any part of this Agreement is rendered void, invalid or unenforceable, such rendering shall not affect the validity and enforceability of the remainder of this Agreement.

21. ENTIRE AGREEMENT. The written Agreement represents the entire and integrated agreement between the Parties hereto and supersedes all prior negotiations, representations or contracts, either written or oral. No subsequent agreement between R&E and Operator to waive or alter any of the provisions of this Agreement shall be valid unless made in the form of a written Amendment signed by authorized representatives of the Parties.

22. COUNTERSIGN AND ELECTRONIC SIGNATURES. This Agreement may be executed in counterparts, each of which shall be deemed an original and all of which together shall constitute one and the same instrument. Both Parties agree that the electronic signatures, whether digital or encrypted, of the Parties are intended to authenticate the writing and to have the same force and effect as manual signatures and the Parties hereby waive any requirement that original signatures be produced as a condition of proving the validity of, or otherwise enforcing this Amendment. Electronic signatures mean any electronic symbol or process attached to or logically associated with a record and executed and adopted by a Party with the intent to sign such record, including, without limitation, Adobe e-signature, DocuSign, E-sign, or the Party’s signature transmitted to any Party via facsimile or Portable Document Format (PDF).

EXHIBIT A
R&E's Performance Metrics

1. **Weight** - The Separation Equipment must physically identify and separate the FSBs from Acceptable Waste and must be capable of handling FSBs with a weight of up to eight (8) pounds per FSB without breaking or tearing the FSBs. FSBs up to twenty (20) pounds are allowable, but FSBs that are torn or broken due to higher-than- eight pound weight will be excluded from any performance metrics.
2. **Capacity** - The Separation Equipment must be capable of processing at least twenty-five (25) tons per hour of Acceptable Waste containing FSBs. (per 2 robot processing line) The burden depth of material shall be singulated so the FSBs can be seen by the Visual Identification System.
3. **Recovery Efficiency** - The Separation Equipment must ensure a recovery efficiency for FSBs of ninety-four (94%) by count.
4. **Recovery Purity** - The Separation Equipment must ensure a minimum purity of recovered FSBs of ninety-two (92%) by weight.
5. **Conditions** – The infeed system is designed to process up to 25 tons of material per hour per line. The material needs to be fed to the infeed chain belts in a consistent manner to allow the in-feed system to properly separate the material into a single layer feed through the picking robots.
6. **Exclusions/Other Requirements–**
 - FSBs that are more than 50% obstructed by other objects in the stream will be excluded from performance metrics. Material coating the FSB itself such that it is less than 50% visible as an FSB will be excluded from performance metrics beyond a commercially reasonable process of FSBs being co-collected in the trash stream.
 - Material that is attached/conjoined to an FSB in such a way that it is carried with an FSB when recovered will be excluded from the purity results in a performance test. Conjoined is any instance where material combines or links with other objects.
 - The Separation Equipment must differentiate from other materials similar to FSBs that are unacceptable (e.g., diaper bags), and must be adaptable to potential changes in the targeted FSBs. Other materials must have differentiating features from the FSB for proper detection to be made. Materials with similar features (color, markings, etc.), agreed upon with Owner, will be excluded from performance metrics. Changes in targeted FSBs can be accommodated through updates to the neural network, provided equipment provider is notified of the change and allowed sufficient visual data of the new FSBs in the material stream. Updates to neural network to improve identification of existing targeted materials at stated recovery and purity rates will be at no additional cost. Updates to the neural network to target additional items or changes to the FSB design may be at additional cost.

EXHIBIT B
Early Termination Fee

The *Early Termination Fee* shall equal the following:

<u>If termination occurs in the:</u>	<u>Early Termination Fee</u>
Start-up Period (but only after Operator acquires the Separation Equipment)	Six Million Six Hundred Ninety-one Thousand Five Hundred Sixty-seven and 10/100 (\$6,691,567.10) Dollars
1 st year of the Operational Period	Six Million Six Hundred Ninety-one Thousand Five Hundred Sixty-seven and 10/100 (\$6,691,567.10) Dollars
2 nd year of the Operational Period	Five Million Eight Hundred Fifty-five Thousand One Hundred Twenty-one and 21/100 (\$5,855,121.21) Dollars
3 rd year of the Operational Period	Five Million Eighteen Thousand Six Hundred Seventy-five and 33/100 (\$5,018,675.33) Dollars
4 th year of the Operational Period	Four Million One Hundred Eighty-two Thousand Two Hundred Twenty-nine and 44/100 (\$4,182,229.44) Dollars
5 th year of the Operational Period	Three Million Three Hundred Forty-five Thousand Seven Hundred Eighty-three and 55/100 (\$3,345,783.55) Dollars
6 th year of the Operational Period	Two Million Five Hundred Nine Thousand Three Hundred Thirty-seven and 66/100 (\$2,509,337.66) Dollars
7 th year of the Operational Period	One Million Six Hundred Seventy-two Thousand Eight Hundred Ninety-one and 78/100 (\$1,672,891.78) Dollars
8 th year of the Operational Period	Eight Hundred Thirty-six Thousand Four Hundred Forty-five and 89/100 (\$836,445.89) Dollars
Any time after the 8 th year	No Early Termination Fee

R&E BOARD MEETING DATE:	March 28, 2024	AGENDA ITEM:	VIII
SUBJECT:	Updates and Reports		
TYPE OF ITEM:	<input checked="checked" type="checkbox"/> INFORMATION	<input type="checkbox"/> POLICY DISCUSSION	<input type="checkbox"/> ACTION <input type="checkbox"/> CONSENT
SUBMITTED BY:	Joint Leadership Team (JLT)		

R&E BOARD ACTION REQUESTED:

For information only.

EXECUTIVE SUMMARY:

- a. **Joint Activities Updates**
Staff will provide updates on Joint Activities work.
- b. **Facility Updates**
Staff will provide updates on R&E Center projects and operations.
- c. **Procurement Report**
Staff will provide a written report of new contracts and amendments executed under the authority of R&E's procurement guidelines during the period of February 1, 2024, through February 29, 2024. Funding for the contracts is available in the approved Joint Activities, Facility and EM&R Budgets, following approval as to form by the Ramsey County or Washington County attorney's office.
